Sensory experience-dependent structural plasticity in the adult brain has been studied almost exclusively from a regenerative perspective. Recent evidence has started to define a role for this plasticity not only in the context of functional recovery, but also in psychiatric disorders such as schizophrenia. Recent findings from both animal models and human case studies have shown that altered cortical circuitry and synaptic plasticity can be seen during and after episodes of neural disinhibition. Given the increasing body of evidence of synaptic change in both senses and schizophrenia, the study of SEH in animals offers new insight into the potential phenotypic manifestations and cognitive sequelae of altered neural plasticity.Q: SSIS Script Component - Exception I am creating a script component using C# and it's throwing this error when I run it on SQL Server (I'm using SSIS 2008): Cannot open the physical file "D:\temp\test2\Script\test_1.dtsx". and I'm sure that the file exists on the server, the script just can't seem to find it. I've looked at the other posts on this and the answers don't seem to apply to my situation. I'm fairly new to SSIS as well but here is the code that I am using to try and load the xls file I have in the project folder into SQL Server Database: SqlConnection con = new SqlConnection(ConfigurationManager.ConnectionStrings["Connection"].ConnectionString); con.Open(); SqlCommand cmd = new SqlCommand("select * from [Sheet1\$]", con); DataSet dataset = new DataSet(); SqlDataAdapter adapter = new SqlDataAdapter(); adapter.SelectCommand = cmd; adapter.Fill(dataset); con.Close(); I have tried to insert a string variable to
